

I am a Big supporter of XM satellite Radio. I love their radio stations, the music, their news and the weather channel. are very helpful and I love it!. I have the freedom to choose what I want and this is really a good choice. we pay for it!.

I am tired of the regular radio stations that always play the same, talks about the same things over and over or stupid things like the talk show in the mornings talking about sex, confusing everyone and giving us the wrong idea about it showing it at the dirty way, and nothing about the reality. creating hate, and filling our brains with emptiness.
